

Charlotte Baker

CSCE 242 – Semester Project Topic Selection

Website Name: Charlotte's Planner

Description: For my project, I'm going to create a website to serve the same purpose as my personal planner and more. It will have my assignments, calendar, to-do list, links I use often, a daily journal, section for class notes, etc. This will help me streamline my life, schoolwork, and extracurriculars into a single website personalized for myself. This way I can make it to my exact specifications and add styles that I find appealing. It will be a baseline that I can add to and change so I can use it beyond the semester I am taking this course.

Page Names:

1. Main Page
2. Calendar
3. Assignments
4. Course Notes
5. Daily Journal
6. Shopping List

Data Description: I will be storing lists of my appointments, events, etc. In the calendar. Also, a list of my assignments for each class that I can add to as they arise and "check off" when completed. Also any necessary information about the assignment and its due date. My page will hold notes I can take for my classes and links to common websites I use. The data added in a daily journal will be recorded with its date. The shopping list will contain items I want in a sort of wish list with its name, link, price, and need level (need, want, future purchase).
